Seminar organised by the UIA with the support of Lexis Nexis

## Bringing together the world's lawyers

*For over 85 years, the Union Internationale des Avocats (UIA - International Association of Lawyers) has been defending the legal profession and facilitating international contacts, cooperation and the exchange of knowledge among lawyers, while respecting their cultural and professional diversity.*

Today, the UIA brings together several thousand members – lawyers or law professionals – and hundreds of bars, federations and associations.

---

## Join the UIA and become a member of the world's strongest network of lawyers

---

- You will participate in the work of the UIA Commissions in Business Law, Human Rights and General Practice and share your experience with that of professionals from over 110 countries.
- You will also be able to join forces with the UIA, which, each year, provides its support to lawyers who cannot freely practise their profession. Everywhere in the world where rights of defence are threatened or the proper administration of justice is hindered, the UIA will make your voice heard.

*Join the UIA during the seminar and benefit from a 50% discount on your membership fee.*

## Introduction

Robotics is the big change of our century. As a matter of fact, robots will allow all areas and a variety of projects are already implemented, ranging from driverless cars, to unmanned aerial vehicles (UAVs) (commonly known as drones), and different forms of human-robot cohabitation in the industrial or business industry and private spaces (service robotics). With the introduction of artificial intelligence, robots are endowed with ever growing capabilities that lead them to work closer with humans.

However, many legal obstacles are still to be removed.

The challenge for manufacturers and project leaders will be to identify and understand the rules applicable to the acquisition, production, provision and use of robots, whether for domestic, surveillance, security, entertainment or personal assistance purposes.

To take up this challenge, it has become urgent to adjust the legal framework in order to ensure that robotics activities will develop in the public interest.

But for robots to find their place in our legal system, we must give them special status and maybe a legal personality. Like a legal person, a “robot person” could have not only rights and obligations, but also an identity and assets.

This is why the UIA organises on June 24, 2016 in Paris this seminar on robotic technologies law.
