Introduction

This programme will examine the biological science and ecological challenges, and the laws in play as a result.

In short, the panel will address biotechnology and the planet's ecology. In more detail, the programme will explore the role of artificial intelligence in medicine, including the enhancement of human mental capabilities through

neural networks; precision medicine and genetic manipulation; the promotion and regulation pharmaceuticals and medical technologies in and for developing countries; climate change, and the regulations, litigation and policies that have arisen in response to such change; and proposals for how to avoid and otherwise deal with future pandemics that may threaten the globe.

All the information relative to our events is available on our Website www.uianet.org

The registration programme will be available soon. For more information, please do not hesitate to contact us.
